Windows XP/2003 Product Keys

DEPRECATION NOTICE

Consider this gist to be deprecated. It's full of information that may or may not be correct, given recent findings. Consider the in-development PIDDatabase, and UMSKT, instead: https://umskt.github.io/PIDDatabase-viewer

Windows XP/2003 Product Keys

These keys have been tested to work. These are a combination of keys from Chinese websites, trial keys inside ISO's, auto-activate keys in OEM ISO's, and directly from Microsoft's website, all aggregated for your convenience.

Usage

In order to use these keys, you need the right edition of Windows XP/2003. Not just Home/Pro/Enteprise/etc, whether it's a Retail, OEM or Volume version. There's a clear cut way to check this.

If you see this, you have a Retail copy.

Your Product Key
Your Product Key uniquely identifies your copy of Windows XP.

🔑 PRODUCT KEY:
ZZZZZ-ZZZZZ-ZZZZZ-ZZZZZ-ZZZZZ

The 25-character Product Key appears on the yellow sticker on the back of your Windows CD folder.

Type the Product Key below:

Entering your product key now is optional but strongly recommended to help avoid complications during activation

Product Key:

[   ] - [   ] - [   ] - [   ] - [   ]

[< Back]   [Next >]

If you see this, you have an OEM copy.
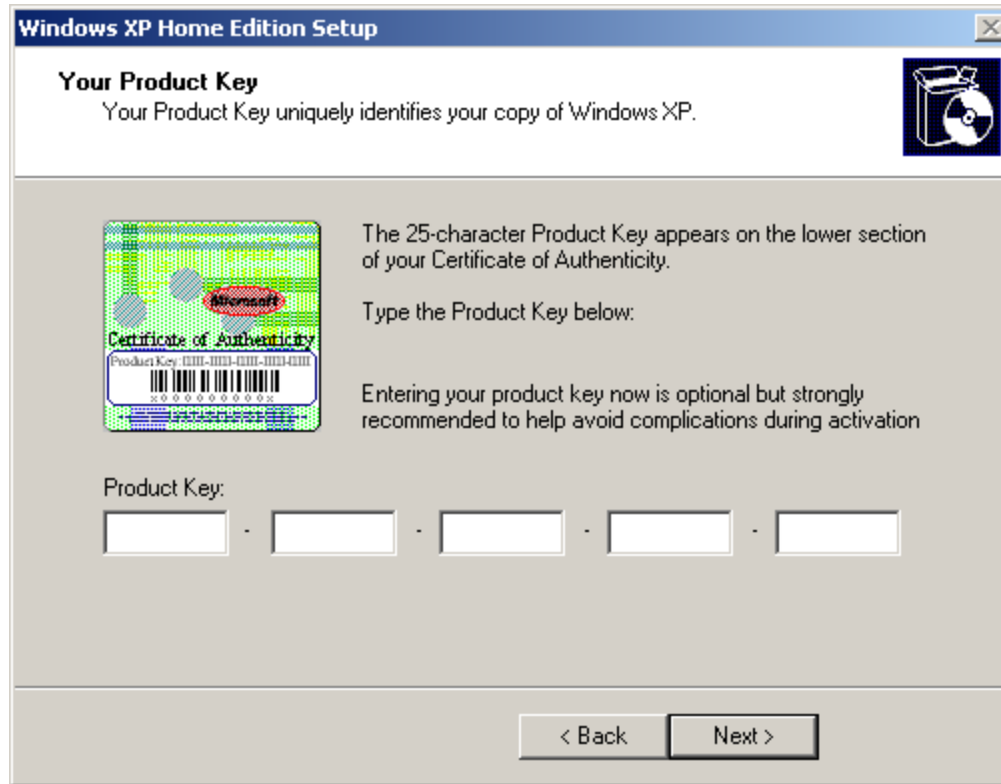

If you see this, you have a Volume copy.
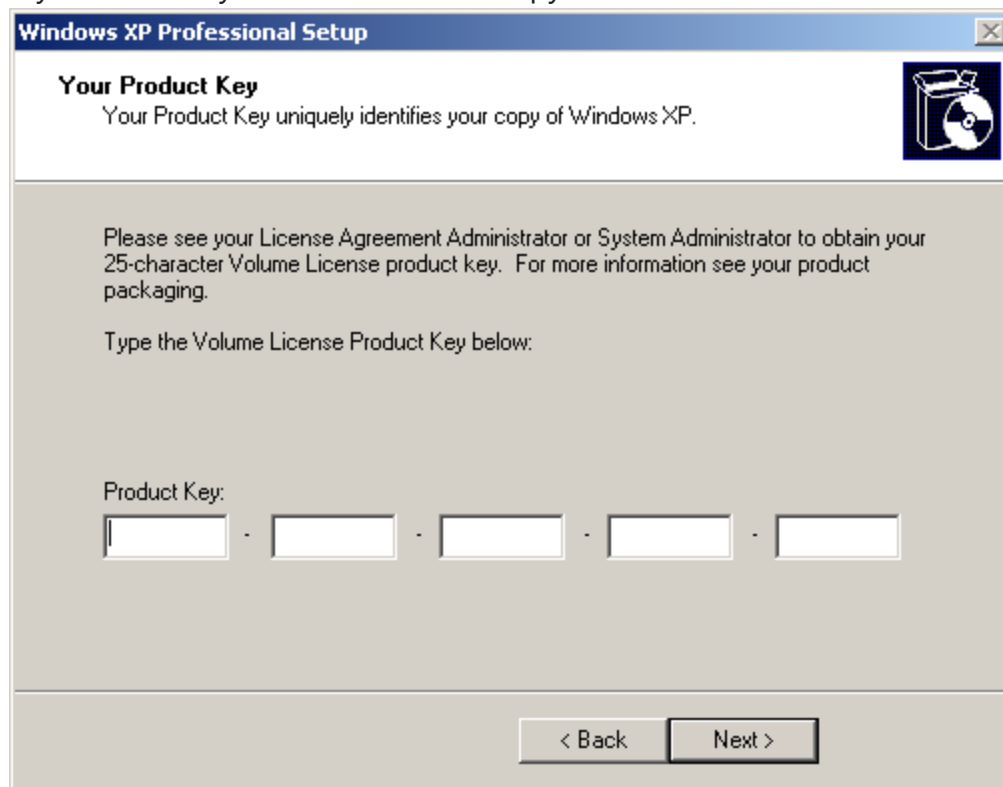

You can tell the edition usually by the contents of the End User License Agreement.

If your version of Windows doesn't need activation, great! You can move on. If it does, you can use UMSKT to generate installation ID's.

Missing Stuff

So far, only 68.4% of all types of keys have been (theoretically) found.

If you see something missing or broken, **report it!** If you have something that isn't on this list, **put it in the comments,** i'll put it on here and give you credit (if you want credit)! If you see something that doesn't exist, say so in the comments so I can remove it.

Hey, have any keys for Itanium?
Thanks!

AutumnHW commented on Nov 27, 2023

[@AutumnHW]() There's a much better version of this document now (UMSKT Research Table). Unfortunately, Google flagged it as spam and locked it to only me (and Itanium isn't on there anyway).

Do you have the ISO for the Itanium edition? It might be possible to make a keygen out of a few files in there.
